WEEK 8_Sun Zhongyi

Task 1 Using the diagrams given in the presentation calculate how much (%) is the effect of applying different modifications (changing the gas, adding an extra pane, using a low emissivity coating) on the U value with respect to a benchmark case of double layer with air and no coating? (keep the gap thickenss to be 13 mm)

Task 2 Consider the house that we analysed in the alst two examples, calculate the heating and cooling load of the other windows which are fixed 14.4 m2 on the west, fixed 3.6 m2 on the south and an operable 3.6 m2 on the south (the same window and frame type). How much does the total value change if I change the frame of the window from wooden one to aluminium?

TASK 1

Using the diagrams given in the presentation calculate how much (%) is the effect of applying different modifications (changing the gas, adding an extra pane, using a low emissivity coating) on the U value with respect to a benchmark case of double layer with air and no coating? (keep the gap thickenss to be 13 mm)

With Double pane glazing (=0.84) & gap thickness 13mm

U- Value of a double pane glazing window if the gap is filled with air is 2.8 $\frac{w}{m_2 k}$

| ε_value | 0. | 84 | | 0.10 | | | 0.84 | | | 0.1 | |
|----------------|--------|---------|--------|--------|---------|--------|--------|---------|--------|--------|---------|
| NO. of panes | Double | Double | Double | Double | Double | Triple | Triple | Triple | Triple | Triple | Triple |
| GAS | Argon | Krypton | Air | Argon | Krypton | Air | Argon | Krypton | Air | Argon | Krypton |
| U value | 2.65 | 2. 6 | 1.8 | 1. 5 | 1. 4 | 1.8 | 1.7 | 1.6 | 1 | 0.8 | 0.7 |
| % of change | 5. 4 | 7. 2 | 35. 7 | 46. 4 | 50 | 35. 7 | 39. 2 | 42.8 | 64. 3 | 71. 4 | 75 |

Task 2

Consider the house that we analysed in the alst two examples, calculate the heating and cooling load of the other windows which are fixed 14.4 m2 on the west, fixed 3.6 m2 on the south and an operable 3.6 m2 on the south (the same window and frame type). How much does the total value change if I change the frame of the window from wooden one to aluminium?
